

Dogwood Elementary **PASS**

Mad Science

Each month our PASS students get to participate in MAD science. The scientist completes different types of experiments relating to the same topic. Recently, our students learned about sound and how it travels. Students get to help the MAD scientist complete some of the experiments, while also observing the scientist.

Tom Turkey

On November 20th our PASS students learned about the different parts of a bird. We had a real turkey come in to visit our PASS students. Students observed the bird, how it moved, its coverings, the sounds it made, and the different parts of its body. Students then worked in small groups with a teacher where they learned about the different parts of the bird (beak, feet, wings, body). At each station the students received the parts of their bird and then were asked to put their bird together using the parts they had received. Then students were asked to tell about each body part of their bird.

HOMEWORK

At 5:00 we begin homework lab in the library. Please know if you choose to pick your child up before 5:00, they will not have their homework completed. During homework lab we have lots of teachers helping our students on their homework and listening to them read.

Mark Your Calendar!

December

December 9th -
Mad Science

December 19th -
Early Release

December 22nd -
January 2nd -
NO PASS
Christmas Break
