

# Mrs. Eidson's Science News

## Scientific Method

We have been working on the scientific method since the beginning of the school year. Students have learned about every aspect of a science experiment through the 6 steps of the scientific method. We will be having our first science test October 14.

## What's Coming Up?

Our next 2 units will be plants and animals. We will begin a research project in the media center at the end of October.

## ASN=Assignment in the agenda

As the end of the first quarter approaches please be on the looking for ASN in your child's agenda. ASN means students have an assignment to be completed either in class or at home.

## Webpage

From now on newsletters will be posted on my teacher page on the Camdenon schools website. Please check it out for other important science information. Newsletters will be posted monthly.
