## Content Area: Mathematics

| Strand: Describe and analyze data | Missouri <br> GLE: <br> D2A |
| :--- | :--- |
| Reporting Topic: Find, use, and interpret measures of center and spread, including ranges |  |
| Grade: 7 |  |

| $\begin{gathered} \text { Score } \\ \hline 4.0 \end{gathered}$ | In addition to Score 3.0, in-depth inferences or applications that go beyond what was taught. For example, the student may: <br> Analyze measures of center from a given set of data (mean and median) to make a reasonable representation of a typical price of a home. Write a true statement representing the situation. |
| :---: | :---: |
|  | 3.5 In addition to 3.0 performance, in-depth inferences and applications with partial success. |
| $\begin{gathered} \hline \text { Score } \\ 3.0 \end{gathered}$ | The student will: <br> Calculate mean, median, mode and range for a given set of data with no major mathematical errors. <br> Interpret and compare measures of center for a situation to choose the most reasonable measure of center which best represents the situation. <br> The student exhibits no major errors or gaps in the learning goal (complex ideas and processes). |
|  | 2.5 No major errors or gaps in 2.0 content and partial knowledge of 3.0 content. |
| $\begin{gathered} \text { Score } \\ 2.0 \end{gathered}$ | The student will: <br> Compute mean, median mode and range with understanding of the process, but some mathematical errors. <br> The student exhibits no major errors or gaps in the simpler details and processes. |
|  | 1.5 Partial understanding of the 2.0 content with major errors or gaps in 3.0 content. |
| $\begin{gathered} \text { Score } \\ 1.0 \end{gathered}$ | With help, a partial understanding of the 2.0 content and some of the $\mathbf{3 . 0}$ content. Compute mean, median, mode and range with help. |
|  | 0.5 With help, a partial understand of the 2.0 content and none of the 3.0 content. |
| $\begin{gathered} \text { Score } \\ 0.0 \end{gathered}$ | Even with help, no understanding or skill demonstrated. |
