

# Hurricane Deck PASS News January 2015

## **Classroom Activities**

### **First Grade**

The first grade students enjoyed exploring many Christmas children's books during the past month. We have a read-aloud story time each day, and it has become a favorite time for the students and the teacher! This is also the time in which we discuss the book and work on comprehension skills. We use the story time to develop and practice writing sentences. In math, the first graders have been focusing on subtraction and fact families.

### **Second Grade**

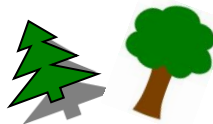

Students continue "Partner Reading" (reading to each other). After reading a book together, we answer the question for the day. These questions are related to characters, plot, and solution. In math, they are playing the game "Go Fish". Currently, they are fishing for combinations for two numbers that add up to 13.

### **Third and Fourth Grade**

Third and Fourth grade also continue to work on one positive thing they have done to show their commitment to being good leaders in their home, school, or community. All third and fourth grade students have won the key to success at least once. Check your child's backpack for praise notes recognizing their achievement for good leadership in PASS.

### **Computer Lab**

Students wrote descriptive sentences of their adopted trees for the months of September, October and December to place in their Tree booklets.
