

1. Integers		
	Order Of Operation Basic operations Word problems Calculator Operations Personal/Business Finance	Use integers to complete Operations. To supervise/fellow workers for that particular operation and assist when needed.
	Order Of Operation Basic operations Word problems Calculator Operations Personal/Business Finance	Use integer to complete assigned operation independently, within given parameters.
	Order Of Operation Basic operations Word problems Calculator Operations Personal/Business Finance	Use integers to complete assigned operations independently, with supervisor checking specific parameters for that particular operation.
2. Fractions, Decimals, and Percent		
	Basic operations decimals Basic operations fractions Conversions Estimations Applications (Personal/business finance)	Accurately use fractions, decimals, and percents to supervise/assist fellow workers to complete a particular operation.
	Basic operations decimals Basic operations fractions Conversions Estimations Applications (Personal/business finance)	Accurately use fractions, decimals, and percents to complete assigned operations, independently, within given parameters for that particular operation.
	Basic operations decimals Basic operations fractions Conversions Estimations Applications (Personal/business finance)	Accurately use fractions, decimals, and percents to complete assigned operations, independently, with supervisor checking specific parameters, for that particular operation.
3. Ration and Proportion		
	Write and interpret Basic operations Applications Calculator	Accurately use ratio and proportion to complete assigned operations, independently, within given parameters for tl particular operation.
	Write and interpret Basic operations Applications Calculator	Accurately use ratios and proportions to complete
4. Units of Measure		
	Conversion within systems	Accurately use various forms of

	<p>Conversion between systems  Reading tools between systems  Reading tools of measurement  Measurement  Accuracy, precision, tolerance  Estimation</p>	<p>measurement to supervise/assist fellow workers to complete assigned operations.</p>
	<p>Conversion within systems  Conversion between systems  Reading tools between systems  Reading tools of measurement  Measurement  Accuracy, precision, tolerance  Estimation</p>	<p>Accurately use various forms of measurement to complete assigned operations, independently, within given parameters for the assigned operation.</p>
